

## TO OUR CUSTOMER

At Cyber Sainik, we believe cybersecurity should be within reach of many to ensure vulnerabilities are not exploited by malicious actors. We democratize the availability of advanced cybersecurity solutions with aggressive pricing and scalability, empowering clients with the confidence of enterprise-grade protection.

Our experience working with small and medium-sized enterprises inspired us to find a better way to achieve proactive defense. By addressing data complexity to enable simplicity, we are modernizing security operations to deliver advanced automation, complete visibility, and empowered human intelligence.

With a modern approach to data, we will simplify, rather than complicate, security operations.

**MAXIMIZE RESOURCES**  
**IMPROVE VISIBILITY**  
**REDUCE ALERTS**

## WHAT WE DO

Cyber Sainik protects small and medium-sized enterprises from today's advanced threats by delivering enterprise-grade tools, techniques, processes, and expertise with 24x7x365 monitoring and management.

### Managed Detection & Response

**Managed Detection & Response (MDR)** by Cyber Sainik simplifies security operations by working across the entire attack surface (Identity, Data, Assets & Network) - regardless of technology or source of potential vulnerabilities. Our unique approach to data configuration and consolidation delivers:

- reduced costs
- improved efficiency
- complete visibility
- simplicity that scales human resources to fully enable tech teams.

Your **security**  
is our **priority**

MODERN RISK  
MANAGEMENT

 **CYBERSAINIK**

Your security  
is our priority

## TECHNOLOGY

With our modern approach to data, we simplify, rather than complicate, security operations. In doing so, we extend the critical role of cyber defense across a broad spectrum of technology resources.

## MISSION

Cyber Sainik is driven to transform the way small and medium-sized organizations defend against modern cyber threats. As the provider of choice in Managed Detection & Response (MDR), we reduce the complexity of security operations while maximizing the value of security spend— all while working with clients to detect and respond to the threats that matter most.

## GOAL

We see a world where a simplified security operations approach is possible, & accessible by any organization. By empowering those who can, and enabling those who should, we can solve the cybersecurity talent shortage & build a proactive defense against the modern attacker through advanced automation & human intelligence.

## Efficient cybersecurity

We believe solutions should be simple, intuitive, and easy to use. By addressing data complexity and enabling simplicity, we will solve the cyber skills gap through advanced automation, visibility, and human intelligence.

## MODERN RISK MANAGEMENT

Human intelligence.

Complete visibility.

Advanced automation.

Lower costs.
